

3rd Grade Homework

Our expectation for homework is that students read 20 minutes every day with the Book Project being completed by the due date. We will provide instructions and materials for each book project at the beginning of each month. These projects will be discussed in class and we welcome any questions.

During the month of September please focus on reviewing addition and subtraction facts. Beginning in October our focus in math will be the learning and memorization of multiplication/division facts. Our expectation is that students work towards mastery of facts at home. We recommend that your student spend 5 - 10 minutes each night mastering facts. Flash cards and websites are great resources for this task.

<u>Month</u>	<u>Genre</u>	<u>Due Date</u>	<u>Project</u>
September	Any book	9/29	Story Map
